## THE NEW PASSES.

The Vancouver Province says: Five new passes across the Rocky Mountains, north of the line of the Canadian Pacific, have been discovered, according to news brought to Vancouver to-day.

For a year a special survey party has been in the field for the purpose of exploring new routes. One of the engineers is Mr. A. S. Going of this city and Victoria.

The result is that the Grand Trunk Pacific will have at least nine routes to choose from in crossing the mountains. More than one of the new routes has advantages over the Yellowhead and Peace River routes, which have been known for many years. The surveys were preliminary, but plans for building the line through the mountains will largely be guided by the reports that have been made to the directors of the Grand Trunk Pacific in the East.

Not only was the country in the vicinity of possible passes through the mountains looked over, but detailed explorations were made in the section of the head waters of the Fraser River, north and east of the Cariboo. These districts have been visited very infrequently by white men. The country is of a varied type, some very wild and other parts open, and altogether promising. Mr. Going says that the gradients on the eastern sides of the new passes especially are easy, for a country of rolling foothills appraches the mountains. On the western side, for an average distance of seventy-five miles, the ground is rough, but it would be quite possible to obtain good grades and at the same time have plenty of room for double-tracking in the majority of the passes.

What are known as the Yellowhead and the Peace River are the best known passes. Besides these are the Smoke River, the New Smoke River, the Porcupine, two Red Deer passes, Wapiti and Pine River. These open either into the Omineca district or the section at the head waters of the Fraser River. Mr. Going also mentions that the country has a heavy growth of timber, especially on the eastern slope, consisting of cottonwood, spruce and poplar.

The party left Edmonton a year ago. The explorers first started for Lake St. Ann, and then went to Fort Jasper, on the upper waters of the Athabasca, where the party outfitted. Then the explorers went to Saskatoon, and as the snow began to fall last autumn at Grand Prairie they pushed through to Wapiti and from there down to the head waters of the Fraser at Fort George. Later they abandoned their horses and came out by dog-train, and by the winter trail reached Ashcroft a few days ago.

## Superfluous Hair

Removed by the New Principle

## De Miracle

Electrolysis, X-ray or depilatories are offered you on the bare word of the operators and manufacturers. DE MIRACLE is not. It is the only method which is endorsed by physicians, surgeons, dermatologists, medical journals and prominent magazines. Booklet will be sent free, in plain, sealed envelope.

Your money back without question if it fails to do all that is claimed for it. DE MIRACLE mailed, sealed in plain wrapper, on receipt of \$1. Write for to-day to DE MIRACLE CHEMICAL CO., 29 QUEEN STREET WEST, TORONTO, or

THE ROBERT SIMPSON COMPANY LIMITED, TORONTO, ONT.

## ROSS BROTHERS LIMITED

ARE THE SOLE AGENTS  
IN EDMONTON FOR THEMONARCH  
RANGE...

There is no question as to what this Range can do or its durability, as thousands and thousands of them are in use on this continent, and so far as we have been able to learn no fault has yet been found with them.

The main body of this Range is built up of sheet steel, and all the other parts that require to be cast are malleable iron. The top is ground to a bright steel finish, and is so heavy that, no matter how long or how hot you heat it, you cannot make it warp or get out of shape.

You will notice that the oven has a drop door, and the above cut illustrates the strength of this door, as any man can stand on it when it is open without straining it in the least. This will give some idea of the strength of the Stove, as all its parts are as strong as this cut of the oven door open with the salesman standing on it would convey to you.

It is a wonderful baker, a very quick heater, and its water front is so constructed that it will heat water nearly twice as quick and on a much less quantity of fuel than any other Range now on the market.

The purchaser of a MONARCH RANGE insures a satisfaction that cannot be measured in dollars and cents, for at the end of ten years' use it will operate as easily and be just as good as when first started.

Remember the MONARCH when you want to purchase a Range.

# Ross Bros. Ltd.

## WHAT OTHERS THINK OF AUTONOMY.

McNort Moon—In the *Montreal Star* of November 16th last, came the following article in regard to Autonomy, advocating a joint meeting of the members of the Dominion Government in the North West Territories and the members of the North West Assembly to discuss this question:

Nanton News—Calgary and Edmonton are flirting with each other for capital honour. Well since Nanton has come to the conclusion that it adds nothing to a town to have such honour, we would rather see Calgary get the plum. They have an established reputation up there as royal entertainers, one of the requisites necessary with the capital building.

Saskatoon Phenix—Regina and Edmonton are to be the two capitals. Would it not be a woeful waste of public funds to remove the capital from Regina after so much has been expended on the public buildings already erected there? From a sentimental point of view also the capital should remain there. It may transpire later on that the new province can be more economically governed from some more central point. It will then be in order to make the change.

Lethbridge News—In advocating the claims of the City of Calgary we do not wish to disparage our own growing and prosperous town of Lethbridge, but in view of the fact that unless somewhat unanimous expression of the opinion in the location of the capital is registered, there is a possibility of it being located at Edmonton or some where nearer the north pole, deem it in the interests of the southern country to stand for Calgary as the future capital.

Blairmore Times—Provincial Autonomy for the Territories with two Provinces appears to be the settled policy of the authorities at Ottawa. While most here desire to have the Territories made into one big province still most will be satisfied with the present arrangement. The most vital question and one in which the people here most violently differ is the question of who are to have the handing of the public land.

Alberta Star—There is some speculation as to the probable name of the new Province which will comprise this part of the North West Territories. There can only be one name and that one will be found on our front page. Name it Alberta. No other name would satisfy the people, no other name would so clearly designate where we are to be found. It requires no prophet to know to predict for Alberta the brightest place in the provincial galaxy! She will win it on her merits and progress. She will win it because her natural resources are the greatest and her people the busiest while her climate is the best and her land the richest. Name it Alberta and let her go at that!

Saskatoon Phenix—The Phenix has said it is on the subject of Provincial Autonomy. We certainly have done nothing to prejudice our readers in favor of the Territories assuming provincial powers. We believe that there was nothing to do so by remaining as we were. Although at times it appeared that the Territorial Government was handicapped through want of funds yet it was apparent that the Federal Government recognized the advancement which was being made in the West and annually showed their willingness to increase the amount of the grant to the Territories. It is questionable whether under the new dignity we will be financially in much better position for some time to come. Those who are pushing the matter do doubtless believe that we will. With Provincial Autonomy comes municipalities and with the latter comes taxation. We believe that new settlers in a new country would rather off without municipal taxation in other ways our local expenses are likely to be increased.

Qu'Appelle Progress—The persistent agitation of the Manitoba Government in favor of extending the boundaries of the provincesward shows that they are determined to annex a portion of Assiniboia if it is possible so to do. While it is admitted that the Dominion Government have full power to carry out this project, it is scarcely to be credited that they will do so in the face of the strong and almost unanimous opposition of Assiniboians in the district interested. The Free Press of Winnipeg, in a recent ar-

ticles on this question, expresses a doubt that the opposition is due to a study of the financial condition of Manitoba. In reply it may be safely asserted that much of the opposition is distinctly due to this very point that in forming a new province we would start with no debt and better terms. Part of the objections is no doubt based on sentiment, but only a small part. It may be necessary to form two provinces. That the people will quietly submit to. But the present generation and generations to come will feel that their wishes have been ruthlessly overruled if they are forced into the province of Manitoba.

Synopsis of Regulations for Disposal of Minerals on Dominion Lands in Manitoba, the Northwest Territories and the Yukon Territory

Coal—Coal lands may be purchased at \$10 per acre for soft coal, and \$20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of 10 cents per ton of 2000 pounds shall be collected on the gross output.

Quartz—Persons of eighteen years and over and joint stock companies holding free miners' certificates, may obtain entry for mining location.

A free miner's certificate is granted for one or more years, not exceeding five, upon payment in advance of \$7.50 per annum for an individual, and from \$50 to \$100 per annum for a company, according to capital.

A free miner, having discovered mineral in place, may locate a claim 1,500 by 1,500 feet by marking out the same with two legal posts bearing location notices, one at each end of the line of the lode or vein.

The claim may be recorded within fifteen days if located within ten miles of a mining recorder's office, one additional day allowed for every additional ten miles or fractions. The fee for recording a claim is \$5.00.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof.

When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$4.00 per acre.

## Telegraph

## PEACE RUMORS

ARE AGAIN PREVALENT.

Russian Press more peacefully inclined  
Special Russian Agent sent fast.

St. Petersburg, Feb. 8th.—The present trend of the press and of public opinion in Russia appears to be setting towards peace. The newspapers no longer hold the necessity of continuing the war at all costs and the Novo Vremya over the signatures of well known war correspondents who have just returned from Manchuria criticize the conduct of the operations there in unmeasured terms, while their papers editorially declare that hopes of victory are remote. The Novo Vremya remarks:—"We go on buying additional vessels hoping to hear news of a Russian success but little or nothing is done to assure it." This is a scene in an altogether popular and present distress and discontent in the working classes and the general desire for reform evidenced by the upper class may develop a strong peace movement with which the Government may have to reckon. On the other hand it is generally admitted that if peace should be concluded under disadvantageous conditions it would materially strengthen the enemies of the present Government which will not fail to keep this fact in sight and hope that some means can be found of reaching an adjustment satisfactory to Russia and Japan. This places special importance on the mission entrusted to M. Admabuza, director of the committee on the Far East who is believed to have gone there in order to report to the Emperor on the possibility of reaching a compromise with Japan without material prejudice to Russia's interests.

## POLITICAL CAUSES

## FOR FINNISH ASSASSINATION.

Finlanders fear the Murder will bring on More Repression and Reprisals.

St. Petersburg, Feb. 8th.—The assassination of Procurator General of Finland, Sisilas Svininen is believed to be undoubtedly due to political causes. The crime is deplored by the Finns who still hoped that the Emperor would undertake the Derg's petition for a return to the former liberal administration and it is feared it may provoke a policy of repression, especially in view of the recent disorders in Helsingfors.

## LINER ASHORE.

## IN A DRIVING SNOW STORM.

The Demara Ran Ashore in Bad Weather—Boat Load of People Missing.

Halifax, Feb. 8th.—The Furness liner Demara has run ashore in a blinding snow storm 50 miles east of Halifax. Passengers and crew abandoned her in two of the ship's life boats. The first boat contained Capt. Gorst and 18 people. The second boat commanded by the First Officer had 17 people and was at sea 10 hours before making land in a treacherous temperature and driving snow. The occupants were half perished and are being taken care of by farmers near the sea shore. The first boat is still missing. If it is afloat yet the condition of Captain and crew and passengers must be simply awful.

The W.C.C. Police.

St. Petersburg, Feb. 8th.—General Karpachkin reports that a detachment of Cossacks commanded by Magaloff were attacked in the night and the position occupied by Japanese who bayoneted 50 men without loss.

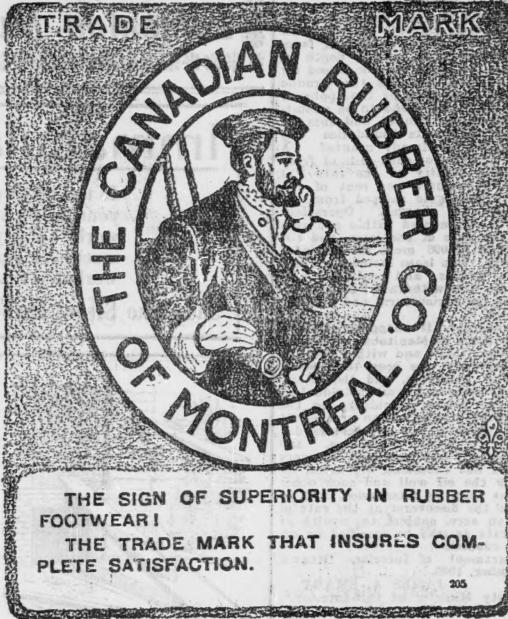

Berlin, Feb. 8th.—The Tageblatt publishes a report that Emperor Nicholas found in his study a letter threatening him with assassination. It is semi-officially denied.

Washington, Feb. 8th.—There has been a revival of reports that the great powers are looking for an opportunity to intervene in the Russia-Japan war.

In some districts it is hard to secure soft water for wash day. When you use

## Sunlight Soap

you don't require soft water, it washes equally well with hard water. It frees the dirt from the clothes without scrubbing or boiling. Try Sunlight. Your grocer will refund your money for any cause of complaint.

## AN EDMONTON CITIZEN

## CHOSEN FOR SCHOLASTIC HONORS.

Rev. D. G. McQueen will be made Doctor of Divinity by his Alma Mater.

At the meeting of the Presbytery yesterday morning in the Presbyterian Church, the Rev. Dr. Herdman, Supt. of Home Missions, announced that the degree of Doctor of Divinity, was to be conferred on Mr. McQueen by Knox College Toronto, his alma mater, at the convocation on April 6th. Members of his congregation and citizens of Edmonton severally, who have long known Mr. McQueen's value as a pastor and influential citizen, will be pleased to find him appreciated as a leader, far beyond the sphere of his most immediate energies.

Mr. McQueen was asked to undertake the work in Edmonton in 1887, and by reason of lack of communication, and because of confidence in him large powers were given him. He was given practically a free hand in the organization and control of the work and the church acted on his advice. He was Unnited Bishop of the Presbyterian Church in the far North West. As the formation of new congregations made it possible to establish Church Government according to the Presbyterian conceptions, there was no disposition on the part of anyone to repudiate his leadership, or question his sound judgment for he was made the first Moderator of the Presbytery, first Convenor of the Presbytery, Home Mission

Committee, and on the change following the death of Dr. Robertson, Convenor of the Home Mission committee for the Synod, which latter position he yet holds.

Residents of this district know well his faithfulness as a pastor, in council and consolation. Visitors to his church were struck with the tenacity with which he stuck to his great purpose of declaring the simple Gospel. Although separated far from influences acknowledged as useful to leaders in Christian work, material issues have not carried him from his purpose. A close student, without being a bookworm, an enterprising citizen appreciating the duties of a citizen, but never taking sides with faction or clique, so that his motives could be questioned; entering enthusiastically into legitimate sport but never giving cause to doubt this serious purpose in life, Mr. McQueen presents a splendid example of the Christian man, nor has he ever passed as a martyr before the Church. The isolation in the early years was as great as that of the Klondyke more recently, comforts as scarce, and the material reward much less; but, as Ralph Connor said of him, "He never thinks of himself." The personal discomfort of himself and even of his wife and family was so unimportant when compared with the opportunity that he never advertised his work. This makes the honor all the more valuable.

THE CHIEF RESIGNED.  
Continued from page one.

led him to lay the alleged plot. The defendant had claimed that even after this he had succeeded in abstracting the five dollar bill from the purse with the other two men watching him. It appeared to him that the Chief had come to the conclusion subsequently that Semerad and Roll knew the amount of the money in the purse, and had tried to get out of the trap gracefully by returning the \$15. If his intentions were good, he could not understand why the chief had asked Novark, after giving him the remainder of the money, if he was satisfied. He did not believe the Chief's story about the giving of the five dollar bill by Novark. The purse contained a small amount of silver, and the inference was that all the money the complainant had was in the purse. If this was the case, how could the complainant give the defendant a five dollar bill after the only bill of this denomination in the purse had been taken out by the defendant? If the complainant had been held up for a reward, it was a state of affairs which should not be tolerated. If the motives of the Chief in taking the \$15 had been those of an honest or a careful man, he would have returned the money to Novark that night, as he did not know whether Novark was a resident of the city or only a transient visitor. In any event, he had no business to retain the money even for that night. He thought the tendency of the Chief's evidence was to show that if his motives were good he had handled the money in such an unbusiness like way and with such disregard of the rights of others and the dignity of his position that he should not be retained. Even after extracting \$15 from the purse, he had not taken a receipt from Novark for the amount turned over to him, and no record of the transaction was to be found on the books of the department.

Alderman Picard said he would second Alderman Boyle's motion on the ground that he could not see how to justify the Chief for acting as he did.

Alderman Griesbach said that his opinions on the matter had been somewhat changed by the evidence of Roll in the case. He held that the police had the right within reasonable limits to resort to unusual means to unearth suspected plots. If the Chief had taken the money with the intention of keeping it he was guilty, otherwise while his action might have been foolish and reckless he had not been guilty of an offence. He thought that the intentions of the defendant could not have been bad as he had told different parties that he had the \$15 and had also returned it. He would oppose the motion as he thought the evidence of Roll explained the intention of the Chief.

The motion was then put and carried. The session of the council was then resumed and the report of the committee of the whole adopted.

The Secretary Treasurer read the resignation of the Chief which was already in his hands and it

## THIS IS TRULY THE IRON AGE.

Some Pertinent Facts in Regard to Iron and Iron Mining.—The Returns to Shareholders from Iron Properties Greater than from any Other Class of Investment, The Iron Mines of The Edmonton Coal and Iron Mining Company Promise Much to the Owners and to the Prosperity of Edmonton and Northern Alberta

We often hear the expression "the iron age," but few of us realize what this term actually means when applied to the present era, as it often is.

In order to better grasp its meaning, and still further to appreciate to the fullest extent all that it entails, let us look back to the "Iron Age" of past history. In those early times when man was yet in his infancy so far as education and enlightenment goes, when life meant a continual struggle for the supremacy of the race, in short, when his best efforts were limited to an extent which it would be impossible for us in our day to imagine, his sole ambition stopped short at the manufacture of a few crude household utensils and weapons of war and the chase. How different it is with us today! Not only are we equipped with cooking utensils and arms of the finest description but, what is still more to the point, we have subjected this all important metal—the greatest of all nature's gifts to her children—to our almost every need. Not only do we use iron and steel which we may call its offspring, for our houses, but we use it for the actual construction of our largest buildings and it is daily becoming more popular. Again, our bridges, railroads, waterways, subways, docks, shipyards, vessels, in fact all our great modern engineering feats and efforts would fail utterly were it not for the presence and the skilful adoption and use of this wonderful metal, iron.

It would not be too much to state that were we to eliminate the use of iron in its various forms from our present day commodities, not only would the commercial world be suddenly checked but we should gradually and surely drift backward to the starting point. In various branches of trade would have ceased, commercial enterprise would be a thing of the past and civilization would be a mere matter of history. Therefore viewing things from this, the only proper light, the logical conclusion we must arrive at is that this twentieth century is the real iron age, the iron age of the past becoming merely the embryonic forecast of the world's great future. Such being the case let us turn to the material side of the case and ask ourselves the question: "Is iron a practically inexhaustible source of our modern civilization and since it is used to such a vast and ever-increasing extent, how is the supply to keep pace with the demand?" Clearly the field is a large one and even the great iron mines now working are not so numerous as to be able to swamp the market at their present output. There is more demand today than there ever was for a good iron mine, and this is especially applicable to our own countries and nations.

Speaking of our own country—this vast Canada—with its limited resources in the form of minerals, timber etc., here we have a young country, a growing country, full of great prospects and with a vast future. Undimmed by the fogs and mists of uncertainty or incompetence she looks up before us in all her might. With outstretched arms she invites us to share her gifts and her future. Her dowry is an ample one, nor does she withhold it from those who have the wisdom to know her charms. Her veins of fine gold and silver, her copper, her iron, her coal, her coal-tar, her oil, her oil-wells, her coal-mines are many and precious. Her ports are many and spacious. Her markets are many and extensive. Her iron will be sure to surely meet her iron-works. With this iron she will build her railways—the Grand Trunk and the Canadian Northern, albeit in themselves a vast undertaking being but an earnest of future and still greater enterprise. She must have also bridges, ships, machinery and the thousand and one other necessities which go to build a large iron kingdom which will surely one day become the pride of this to build up a nation! Great is her up-our meaning which this implies and ask yourself the question "How are we going to obtain all this iron which is needed?" The answer is simple. Either Canada must import all her iron and by this we include steel, or she must supply her own iron. Would we, knowing that we have fruit in our gardens, go elsewhere to obtain it at a greater cost? It hardly seems feasible. Then let us think what we have ready to our hand, in other words let us take hold of the vast iron deposits which we know from the best authorities and can see for ourselves we possess. Let us work work them, not indiscriminately throwing away money by carelessness and with due regard to location and the probable measure of success which such location promises.

There are those who would say that the average percentage of iron

mines which are paying is small compared to the number of mines upon which large sums of money have been spent. Here again, notwithstanding the fact that although the number of failures in iron mines has been far less than that of any other mineral, we find a class of people who rather upon their own ideas of what should be, than upon the advice of experts who deal with the things they are. Such is the class who would, after losing money by their own carelessness, decry any form of mining who, in short, impede the march of progress!

It has been said that in order to take an intelligent interest in the affairs of his country every man should study politics. How much more then should he not take an active interest in pulling up his country by studying its natural resources and assisting to develop them!

It almost devolves upon us as a duty, which we owe to our children and our children's children, this laying of the foundation stones of the future, and this being the age of iron it would seem that in that direction lies the work we have set ourselves to perform.

One naturally asks "where am I to start and how?" We will consider the first part of the query carefully, being guided by past experience and backed up by statistics, for these are the testimonios exacted from us by nature before she will yield up her stores in trust for future generations. Taking the iron belts on the continent of America we find that they have their defined limits and their directions as truly as the arteries in the human body. For instance if we follow the brachial artery near our arm pit and run across it again at our wrist we may safely conclude that it is the same artery, or lead as it would be termed in mining parlance. It is not our design to bewilder the reader or prospective investor with a list of iron mines paying high dividends, nor do we sketch out a geographical chart of all the iron districts and leads on the American continent, but the following example will serve to show the well nigh infallibility of mining operations where carried out on the basis above illustrated.

We refer to the world famous iron mines of the Mesabi range in Minnesota, U. S. A. Throughout the entire length of this range in recent years there have been many valuable claims taken up and today some of them net an enormous income to those who were far-sighted enough to invest in them. One particular case is that of a gentleman who now rejoices in the sobriquet of "Iron King" of Duluth. About twelve years ago he purchased eight thousand acres of timber land in the iron belt above named for the sum of \$30,000. After inspecting the timber he offered to sell his property for less than he had paid for it, but no one would buy it. Some two years after he discovered that the iron oxides exposed on his land were valuable, and he sold the rights to take the iron off his eighty acres to the American Steel Corporation, charging them 25 cents per ton for all the ore they took. This has netted him \$8,000,000.00. His income from this source is now \$75,000 per day.

Almost due north some 100 miles from the Mesabi range lies an immense deposit of iron oxide, the property of the Edmonton Coal and Iron Company of Edmonton. It is located near Edmonton in Northern Alberta not far from the Canadian Northern Railroad and close to the route of the Grand Trunk Pacific, besides which it is within eight miles of the Saskatchewan river which is navigable, and is connected by wagon roads to Edmonton.

Speaking of experts, Mr. Wm. Blackmore, member of Institute of Mining Engineers, England, has reported on this valuable property. He says that in his opinion the company has in this case a "most valuable asset and easily and quickly realizable, as it is more than likely from the character and occurrence of the deposit that the springs come from a stratified ore body below which could be closed by boring."

Alluding to a proposed expenditure of \$10,000.00 he adds: "Having had thirty years experience in locating iron working various iron deposits I have no hesitation in saying that this is available property and one which will justify the expenditure recommended."

The mineral deposits he finds by analysis consists of 45.2 per cent of metallic iron from surface ore and as he further states, not only could it be used to produce a marketable oxide, for which a market could readily be found, but it could also be used in combination with other ores or smelting and iron and steel manufacture, similar to that so successfully smelted at the Radnor ranges, Quebec province for many years.

Small wonder then that one of this valuable and immense property has created such a stir among mining circles in various parts, not only of this country but elsewhere.

## Abbey's Effervescent Salt

80 Ready-to-Wear and Pattern Hats at prices that will surprise you.

DON'T FAIL TO SEE THEM.

Also a table of Children's Tams and Hats at half price.

### Fur Department

In Ladies' and Gent's Fur Coats we lead the world, and particularly this trade. As we have no cold storage in this city we must dispose of them in the next few weeks. Prices have been slaughtered.

### Special Sale of Heating Stoves.

We have just a few lines in Heaters left. These we offer at a discount that will appeal to you.

## REVILLON BROTHERS, LIMITED.

# We Paid \$100,000

For Liquozone, Yet We Give You a 50c. Bottle Free.

We paid \$100,000 for the American rights to Liquozone; the highest price ever paid for similar rights on any scientific discovery. We did this after testing the product for two years, through physicians and hospitals, in this country and others. We cured all kinds of germ diseases with it—thousands of the most difficult cases obtainable.

We proved that in germ trouble, it always accomplishes what medicine cannot do. Now we ask you to try it—try it at our expense. Test it as we did; see what it does. Then you will use it always, as we do, and as millions of others do. You will use it, not only to get well, but to keep well. And it will save nearly all of your sickness.

### Kills Inside Germs.

Liquozone is not made by compound drugs, nor is there alcohol in it. Its virtues are derived solely from gas—largely oxygen gas—by a process requiring immense apparatus and 14 days' time. This process has, for more than 20 years, been the constant subject of scientific and chemical research.

The result is a liquid that does what oxygen does. It is a nerve food and blood food—the most helpful thing in the world to you. Its effects are exhilarating, vitalizing, purifying. Yet it is a germicide so certain that we publish on every bottle an offer of \$1,000 for a disease germ that it can-

not kill. The reason is that germs are vegetables and Liquozone—like an excess of oxygen—is deadly to vegetable matter.

There lies the great value of Liquozone. It is the only way known to kill germs in the body without killing the tissues too. Any drug that kills germs is a poison, and it cannot be taken internally. Medicine is almost helpless in any germ disease. It is this fact that gives Liquozone its worth to humanity. And that worth is so great that we have spent over one million dollars to supply the first bottle free to each sick one we learned of.

### Germ Diseases.

These are the known germ diseases. That all medicine can do for these troubles is to help Nature overcome the germs, and such results are indirect and uncertain. Liquozone attacks the germs, wherever they are. And when the germs which cause a disease are destroyed, the disease must end, and forever. That is inevitable.

### Actions.

Hepatitis—Anemia  
Bronchitis  
Blood Purification  
Diseases of the Heart  
Hemorrhoids  
Hemorrhage  
Cough-Croup  
Cough-Cold  
Carcin-Cancer  
Diseases of the Liver  
Diseases of the Bowels  
Dyspepsia  
Eczema—Psoriasis

### Other Diseases.

Gout—Gout Stones  
Gout—Gouty Diseases  
Gout—Gouty Gout  
Varicose—Varicose  
Women's Diseases

All diseases that begin with fever—all infirmities that are caused by cold, dampness, etc.—are the results of impure or poisoned blood.

In nervous debility Liquozone acts as a vitalizer, accompanying what no drugs can do.

### 50c. Bottle Free.

If you need Liquozone, and have never tried it, please send us this coupon. We will then mail you an order on a local druggist for a five-dollar bottle, and we will pay the druggist ourselves for it. This is our free gift, made to convince you; to show you what Liquozone is and what it can do. In justice to yourself, please accept it to-day, for it places you under no obligation whatever.

Liquozone costs 5c. and 25c.

### CUT OUT THIS COUPON

for this offer may not appear again. Fill out the blanks and mail it to The Liquozone Company, 538-544 Wabash Ave., Chicago.

My disease is:

I have never tried Liquozone, but if you will supply me a 50c. bottle free I will take it.

.....

C B Give full address—write plainly.

Any physician or hospital not using Liquozone will be gladly supplied for a test.

### DAILY SUBSCRIBERS

Will confer a favor by notifying the Office by phone or otherwise of any failure to deliver; so that explanation can be made and future failure guaranteed against. . . . .

## LOCAL

—Train on time.

—The Jubilee singers appear in Robertson's hall this evening.

—The Calgary city council has made a grant of \$50.0 to the Western Canada Immigration Association.

—Rev. C. H. Huestis delivers the fifth of his series of lectures in the MacDougall church this evening. The subject will be, "Teaching The Story."

—The secretary of The Fire Brigade begs to acknowledge with thanks the receipt of a donation of \$75.00 from Messrs. Gariépy & Lessard on account of their fire on Jan. 2nd 1905.

—Alex. McLay was in the city yesterday from Coronation. He is arranging to erect coal sheds on some lots near Rat Creek recently purchased by him.

—The annual ball of the Old Timers will be given on Friday evening in the new H. B. Co.'s Block. Clarke's excellent Orchestra, with their regular number of performers (nine) will provide the music.

—Notice is given in the Territorial Gazette of the intention of the village of Lumsden to apply for incorporation as a town municipality. The notice is signed by A. Blair, overseer of the village.

—Albertan:- The first of the three new churches which have been in and are in course of erection, was opened yesterday, when for the first time the Methodists worshipped in their new church on the corner of Eighth Ave. and First St. West.

The Ladies Aid of the Presbyterian Church of Poplar Lake will give a St. Valentine's Social on the eve of Feb. 14 at the residence of Mr. Hodgings. Refreshments will be served. All are invited. Rev. McQueen, of Edmonton, will be present.

—Regina Standard:- A general meeting of the School Board was held on Thursday night, and it was decided to purchase from William Pearson & Co. fifteen lots on the corner of McIntrye St. and 13th avenue, on which to erect the new school. The price paid was \$4,125 for the whole, or \$275 each.

—Regina Standard:- Still another new church will be erected in this city possibly within the coming summer. The Methodist congregation has become so large under the pastorate of Rev. Hamilton Wigle, that they find the present church altogether too small, and will accordingly build a new one. It has not yet been decided whether or not the new building will be on the same site as the old one.

Nanton News:- There has been unloaded at Pincher Creek a standard oil boring rig of the heaviest type made. It is capable of boring a 12-in. hole to a depth of 3,500 ft. and is the first rig of this class to be installed in Western Canada. It will be transferred by wagon to the South Kootenay Pass and will be used in the fields there. A machine of this standard is what we want in the Nanton district.

—The Willing Workers of the Anglican church intend to hold a carnival week after next.

—The C.P.R. have appointed G. A. Graham Superintendent of terminals at Winnipeg.

—Cushing Bros. bought the lumber business of the Red Deer Lumber Co. and took the management the first of the present month.

—A new brick block will be erected at once on Jasper avenue, next Nankin's jewelry store. The block will contain two stores, one to be occupied by the Perfect Clothing Co.

—The ladies of the Woman's Aid Society are serving refreshments at the bazaar in the skating rink waiting room in aid of the Orphelin hospital. Donations thankfully received. Curlers and friends are invited to patronize the lunch counter.

—Regina Standard:- Dr. George Charlton, who is in Montreal for a few days, visiting friends, is on his way to Regina to take up the duties of his new office here. Dr. Charlton has been appointed by the Government of the Northwest Territories, to establish a Bacteriological and Pathological Laboratory at Regina. He expects at the start to devote himself particularly to the study of the diseases of cattle and horses.

—Regina Leader:- Judgment was given last Friday morning at the Court House, Regina, in the case of Mrs. Andreas versus the C.P.R. Co., in which the plaintiff sought to recover the sum of \$15,000 damages on account of the killing of her husband, Nicholas Andreas, and a wagon and a team of horses by a passenger train at Albert Street crossing, Regina, on the 22nd of June, 1903. At the trial the jury brought in a verdict in favor of plaintiff awarding \$400 for the killing of the horses and the destruction of the wagon, and \$5,000 for the killing of Andreas.

—Prince Albert Times:- A shooting accident took place on Tuesday night in the Prince Albert Hotel, when Mr. Tom Marks the well known and popular comedian, and manager of the company now playing at the Opera House, was the victim. It appears that after the performance on Tuesday night Mr. Marks went to the Prince Albert Hotel and entered into conversation with a member of the R.N.W.M.P. Previous to this the officer had taken a loaded revolver from a man who was flourishing same to the danger of the bystanders. During his conversation with Mr. Marks this revolver was accidentally discharged into the actor's foot. He was at once removed to the Windsor Hotel, where he is staying, and will be confined to his bed for a couple of days.

## PERSONAL.

A. W. Ormsby visited Calgary last week.

W. H. Cushing comes in from Calgary this evening.

Mrs. A. E. May will not receive on Friday of this week.
